

Rubber Products

General

Flexible rubber adapters and elbows have smooth radii and inside surfaces to minimize flow resistance within the air intake system.

Specifications

- EPDM rubber construction for improved heat resistance and low temperature flexibility (-40°C to 100 °C).
- Non corrosive construction resists tears, punctures, and vacuum collapse under severe conditions.
- Ideal for light-, medium- and heavy-duty applications.
- Elbows ribbed or compounded for extra strength and durability.
Rubber adapters help to absorb vibrations and reduce intake noise level.

90° Rubber Elbows & Reducing Elbows

90° Elbows				
Part Number	Dimensions			
	A mm	B mm	R °	Outer Dia mm
